

## Improving the quality and accessibility of african medicine, edition no. 28 of Proparco's magazine

Mehdi Tanani Senior Investment Officer - *PROPARCO*

January 17 2018

Mehdi Tanani, Senior Investment Officer and Head of Proparco's Healthcare division, sets out the major issues tackled in this edition of the magazine.

This new edition of Private Sector & Development tackles all of these issues and attempts to come up with a few pointers and solutions for the future. It lets researchers, associations and public health organisations give their own views and recount their experiences: the whole issue of patents, for example, and private African start-ups such as mPharma and Pharmivoire Nouvelle, a pioneering local producer of pharma products in Côte d'Ivoire.
