

Finnfund

March 26 2012

Finnfund is a Finnish development financier and impact investor. It aims to build a sustainable future and generate lasting impact by investing in businesses that solve global development challenges in developing countries. Each year Finnfund invests 200-250 million euros in 20-30 projects, with an emphasis on renewable energy, sustainable forestry, sustainable agriculture, financial institutions and digital infrastructure and solutions. Today Finnfund's investments and commitments total about 1.070 billion euros, half of which is in Africa.
